

50MM X 75MM JOIST HANGER DECKING FRAME

Compatible with 47mm x 100mm timber joists, this galvanised steel hanger is ideal for decking and timber frames. Sold individually, it features pre-drilled holes for quick installation and provides strong, long-lasting support for your structure.

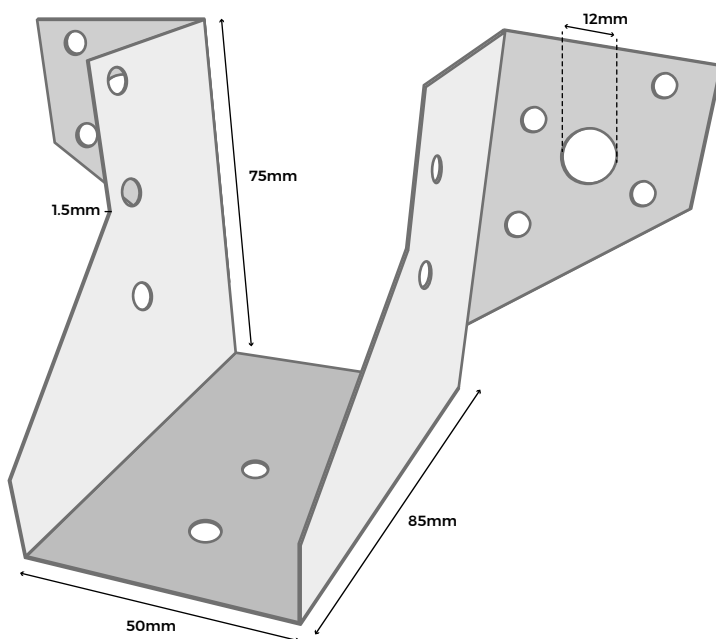

COLOUR RANGE

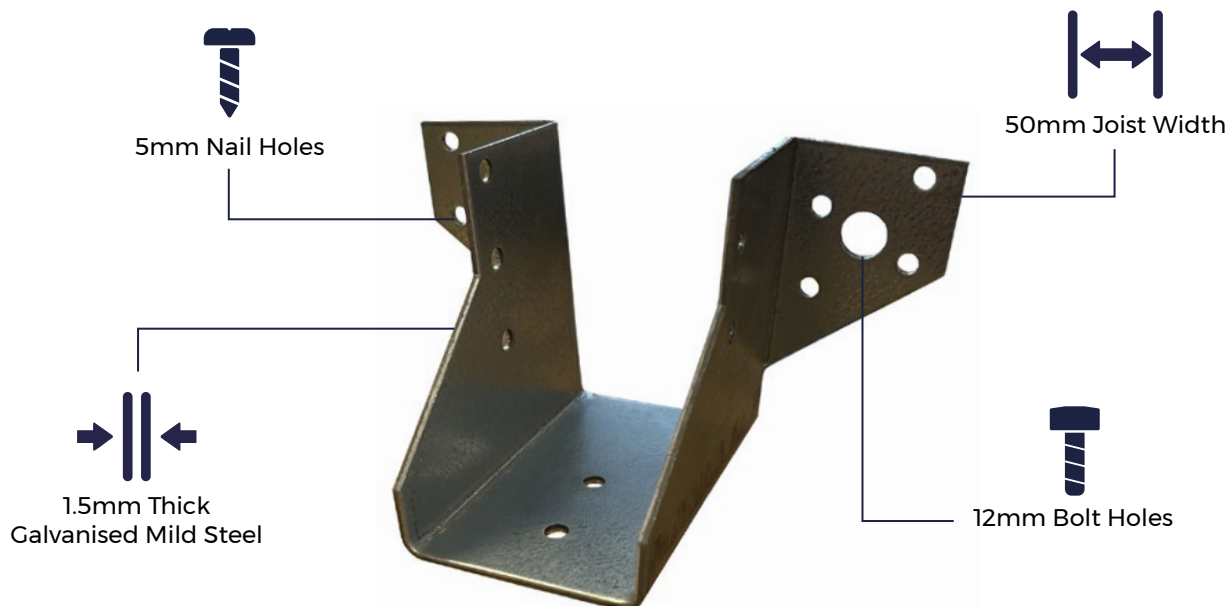

GALVANISED

SPECIFICATIONS

SKU	FFJH75
Gap Width	50mm
Height	75mm
Thickness	1.5mm
Pack Size	Single

Please Note: Images are for illustration purposes only. Actual products may vary slightly from those shown.

MATERIALS

Joist hangers are made from 1.5mm galvanised mild steel for increased durability.

RESISTANCE

The high-quality galvanised steel material protects against water and rust damage.

ACCESSORIES

When using timber joists, frame protection deck tape can be applied to protect cut ends and joins.

LOW MAINTENANCE

Cladco joist hangers require little to no maintenance once installed correctly.

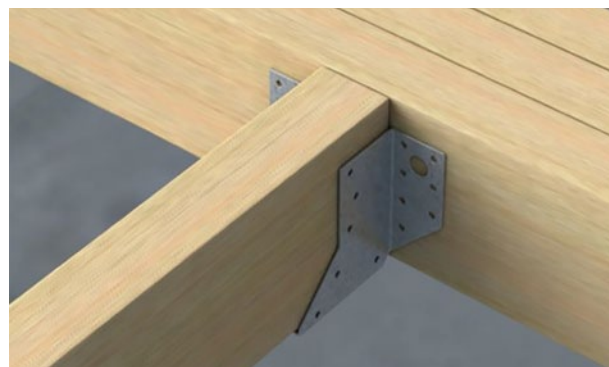

LONG LASTING

Galvanised mild steel protects from rust and corrosion for a long-lasting decking subframe.

INSTALLATION ADVICE

Install using 30mm x 3.75mm square twist nails. 12mm bolt holes are also included in the hangers for added stability. The hanger depth must be at least 60% of the depth of the supported member to prevent rotation unless additional lateral restraint is applied to the top of the supported member.

We recommend filling all the holes in each hanger for the best support using the correct size fixings.

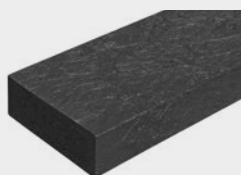

For detailed information about installation, please read our decking installation guides.
