

COMPOSITE FENCING

FENCING POST 3M

Cladco Composite Fencing Posts ensure lasting quality over time, made from high-quality recycled wood fibres and recycled plastic that also looks great. Available in a range of colours to match Cladco Composite Fencing Panels, including Teak, Stone Grey, Coffee, Charcoal, Olive Green and Redwood.

Composite Fence Panels can be screwed to the front of Cladco Composite Fence Posts, or you can channel a groove to slot the Composite Fence Panels into. View our full range of Fencing products and create stunning Fencing for your garden or similar project with Cladco Fence products.

*Please note: due to variations within the manufacturing process of these Posts, we advise to measure 20mm and channel this out rather than using the lines on the Posts, if installing Panels using the slot between method. If installing by securing to the front of the Composite Post, this process does not need to be followed.
