

COMPOSITE FENCING CONCRETE POST SPACER

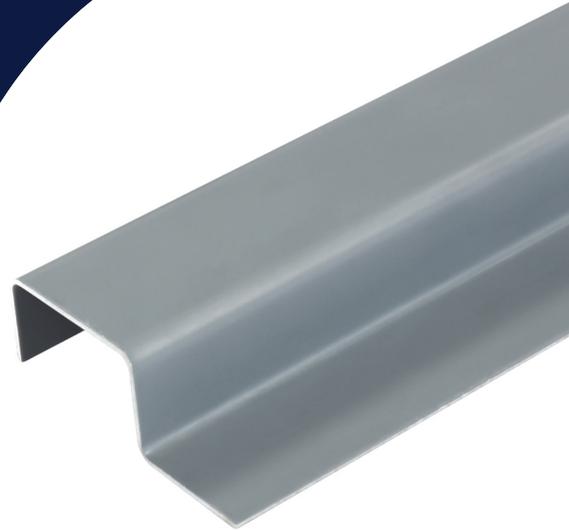

Cladco Concrete Post Spacer Trim is designed to allow Cladco Composite Fence Panels to be installed securely into concrete posts for a stable and secure fitting.

The Spacer Trim will reduce the 50mm gap to a 21mm gap for Cladco Composite Fence Panels to be installed in.

If your perimeter fencing needs updating and has concrete posts, this metal Spacer Trim will mean you just need Cladco Composite Fencing Panels.

This metal Spacer Trim has been manufactured to fit into concrete posts that have a 50mm panel groove. Spacers are manufactured from rust-resistant, low-maintenance metal and are available in a grey colour to blend into concrete posts.

Concrete Post Spacer Trims for Composite Fencing Panels are supplied in 3-metre lengths and can be cut to fit your Composite Fencing project using Aviation Tin Snips, if required.

SPECIFICATIONS
