

## COMPOSITE DECKING

### Fascia Board 2.4m

Cladco Composite Fascia Boards are manufactured to protect the ends of your decking project while also concealing any Joists and joints. Fascia Boards also help to prevent any debris or animals entering the underside of your decking.

Cladco Composite Fascia Boards are two sided, with a woodgrain effect surface on one side and narrow grooves on the other, giving you the choice of using either side during installation.

Composite Fascia Boards are particularly useful when installing a raised Cladco Composite Decking area and can be installed behind steps, around edges, and on the sides of most decking projects. Fascia Boards can also be used for various DIY projects, such as covering soffits.

Composite Fascia Boards are manufactured from 60% recycled hardwood fibres and 40% recycled plastic, to provide decking areas with an environmentally-friendly trim.

SPECIFICATIONS	
Board Length	2.4m
Board Width	146mm
Board Thickness	10mm
Board Weight (Approx)	4kg
