

DECKING FRAME

Recycled Plastic Joist

Cladco Recycled Plastic Joists are manufactured to be a high-quality, durable alternative to traditional timber joists and designed to provide a low-maintenance, supporting substructure for your Cladco PVC, Composite or Timber Deck.

Recycled Plastic Joists are produced within the UK using 100% post-consumer plastics, which are then shredded, melted and poured into moulds. Joists are available to order in black and brown.

These 100% Recycled Plastic Joists do not need to be treated, sanded or varnished and come with a variety of other beneficial properties including:

Made from 100% recycled plastic

Environmentally friendly

10 year guarantee

Superior strength

Low-absorption and rot proof material

Use with PVC, Composite or Timber Decking

Use on concrete, grass or uneven ground

| SPECIFICATIONS | |
|---------------------------------|-----------------------|
| Each Joist measures | 3600mm x 50mm x 150mm |
| Each Joist weighs approximately | 19.5kg |

COLOURS

Black

Cladco Plastic Joists require support every 1m for the structure of the joist itself. When installing composite decking onto plastic joists, we advise 400mm centres. For plastic joists and PVC decking installations, we advise 300mm centres. For more information on how to install correctly, consult our Installation Guides.
