

SOLID COMMERCIAL GRADE Composite Decking Board 2.4m

Cladco Solid Commercial Grade Composite Decking Boards feature a flat surface on one side and the other with narrow-spaced grooves, which is recommended due to its low-slip properties making them especially effective in wet weather conditions. The narrow-grooved side is also more appealing when it comes to staining and watermarks, which are more noticeable on the flat side. Cladco Solid Composite Decking Boards require very little maintenance and are easy to clean when required.

Our 2.4m Solid Commercial Grade Composite Decking Boards are FSC® certified and are made from 60% recycled hardwood fibres and 40% recycled plastic, bonding agent, additives and tint. They also come as standard with a 10-year factory backed warranty for added peace of mind.

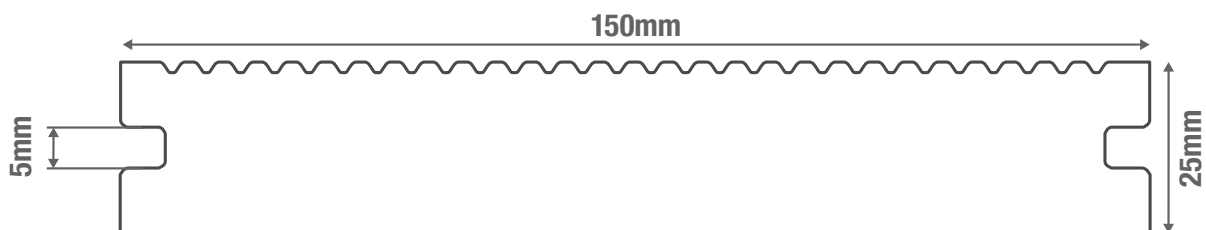

All Cladco Composite Decking products are available as FSC® certified for the same cost. If you require FSC® certified products please ask for these when placing your order.

Benefits Of Solid Composite Decking Boards

Compared to Hollow Core Decking Boards, Solid Composite Decking Boards have much better strength and sound dampening properties, making them great for any situation where they will be subjected to large loads and general heavier usage. Solid Composite Decking Boards make ideal use for commercial purposes, giving extra reliability when it's needed.
