

WOODGRAIN EFFECT Composite Decking Board 2.4m

Available in a range of colours, including Teak, Coffee, Charcoal, Ivory, Stone Grey, Redwood and Olive Green, each Board is produced using the same combination of 60% recycled hardwood fibres and 40% recycled plastic, bonding agent, additives and tint as with our Solid and Hollow Composite Decking range. All Cladco Composite Decking Boards can be cut or sanded to fit your needs.

The Woodgrain Effect Hollow Composite Decking Boards are reversible, however please note you may find this Woodgrain Board more slippery than the low-slip rated Original Composite Boards. Both sides are low-maintenance and do not need you to stain or paint.

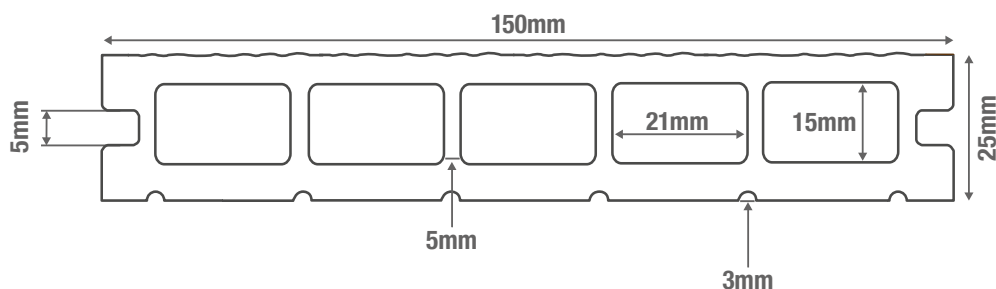

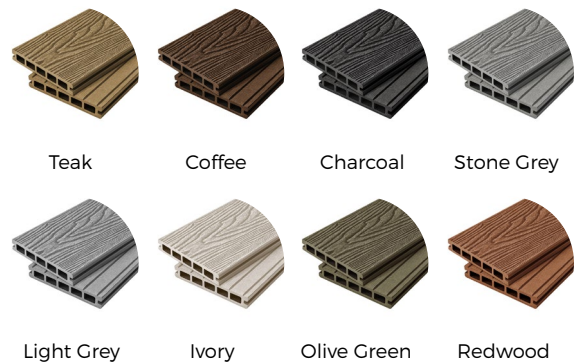

All Cladco Composite Decking products are available as FSC® certified for the same cost. If you require FSC® certified products please ask for these when placing your order.

Why Our 2.4m Hollow Decking Boards Are A Great Option

When you want your Decking Boards to really stand out and give a natural timber look, Cladco 2.4m Woodgrain Effect Hollow Composite Decking Boards will satisfy your needs. Lightweight using a hollow-core honeycomb design, Cladco Hollow Domestic Grade Decking is a great option for any project, with the bonus of an attractive Woodgrain Effect.
