

SOFTWOOD SPRUCE TIMBER DECKING BOARD 4.8M

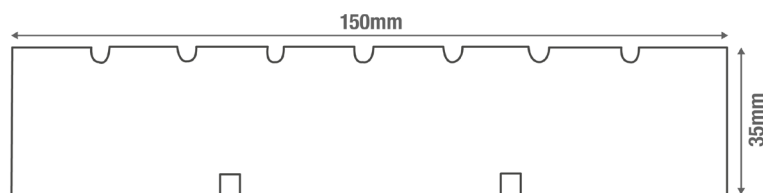

Cladco 4.8m Timber Decking Boards are made from softwood spruce, one of the most popular types of timber around.

Timber Decking Boards are highly durable and offer long-lasting protection from the elements. Our timber is kiln dried for increased stability and water resistance, as an additional measure.

Each of our Timber Decking Boards is green pressure treated, meaning long-lasting durability and easy maintenance all year round.

We recommend using the Boards on top of a solid, structural base using our Timber Joists to ensure stability. Additionally, we can provide Fixings to correctly fit Timber Decking Boards.
