

WALL END TRIM Fibre Cement Trim

Wall End Profile Trims are used where a Wall Cladding project meets an adjoining property, for example on semi-detached buildings, or where the Wall Cladding Boards finish on a corner.

Wall End Trims are manufactured to suit 50mm battens. To customise your Wall End Profile Trims, please contact us with the dimensions of your battens for a bespoke size.

Complete your Cladco Fibre Cement Wall Cladding project with Wall End Profile Trims, available in matching Fibre Cement Cladding colours to blend in with your existing design.

Wall End Profile Trims are manufactured from high-quality aluminium for corrosion resistance, and are profiled to specification based upon the size of your Wall Cladding battens.

CLADCO TRIMS

SYMMETRIC EXTERNAL CORNER TRIM

Designed to fit on the corners of the building, Fibre Cement Wall Cladding Boards are installed to the flat edges of the Trim.

INTERNAL CORNER TRIM

Used in the internal corners of a building for a neat, seamless finish.

WALL END TRIM

Installed on the finishing edge to conceal exposed ends of Fibre Cement Wall Cladding Boards.

SINGLE & DOUBLE CONNECTION TRIMS

Installed to the inside edges of window reveals and door frames to support Boards.

PERFORATED CLOSURE

Installed under the Battens at the base of the build, or at the top of any doors and windows, to ensure ventilation throughout the installation. Perforated Closure also protects the build from any dirt or insects penetrating the air flow space.

START TRIM

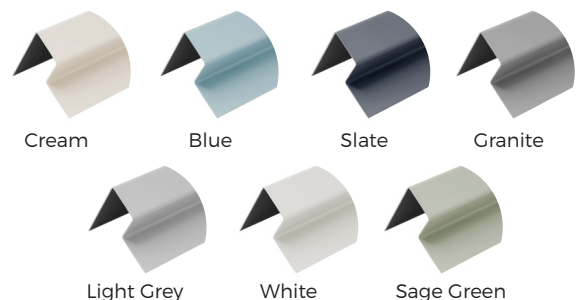

Installed at the start of new Board runs at the base of the building.

ASYMMETRIC EXTERNAL CORNER TRIM

Designed to be installed on either side of the door or window, allowing Boards to be fitted on the flat surface of the Trim.

SPECIFICATIONS	
Length	3 metres
