

FENCING BOARDS

Composite

Artificial Fence Panels Built to Last

Available in a range of colours including redwood, olive green, ivory, teak, coffee, charcoal, light grey and even stone grey, you can be sure any selection of Cladco composite fencing panels will complement any existing or future Cladco projects.

Measuring 3600mm long, 210mm high and 21mm deep, Cladco composite fence panels can easily be screwed through into timber or composite fencing posts. Made from 60% recycled hard-wood fibres and 40% recycled polyethylene, bonding agent, additives and tint, Cladco recycled wood fence panels will cover 3600mm x 200mm per board when fitted horizontally.

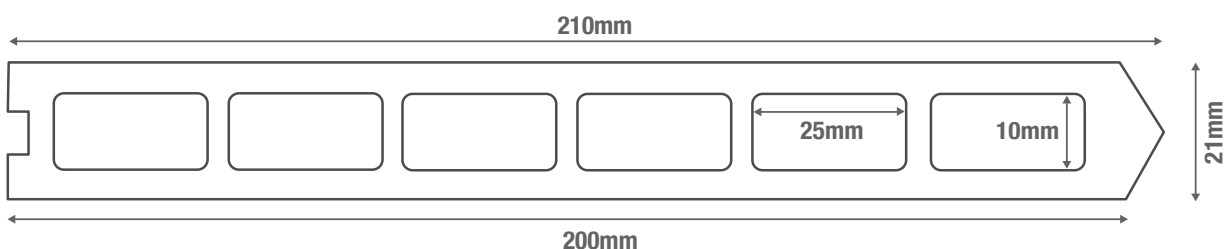

Why Choose Our Composite Fencing Panels

When taking on a project that needs to utilise artificial fence panels, they need to withstand a lot including the elements and the last thing you need are poor quality recycled wood fence panels.

Composite fencing needs to be strong, with alternative recycled wood fence panels not up to the task. Composite fence panels are constructed from a lightweight, honeycomb design, and slot together easily to make your project quick and simple.

SPECIFICATIONS	
Board Length	3.6metre
Board Width	210mm
Board Thickness	21mm
Each board weighs approximately	11.52kg
