

RECYCLED PLASTIC JOISTS

Cladco Recycled Plastic Joists are manufactured to be a high-quality, durable alternative to traditional timber joists and designed to provide a low-maintenance, supporting substructure for your PVC, Composite or Timber Deck.

These Plastic Joists are produced within the UK using 100% post-consumer plastics, which are then shredded, melted and poured into moulds.

These 100% Recycled Plastic Joists do not need to be treated, sanded or varnished and come with a variety of other beneficial properties including:

Made from 100% recycled plastic

Environmentally friendly

10 year guarantee

Superior strength

Low-absorption and rot proof material

Use with PVC, Composite or Timber Decking

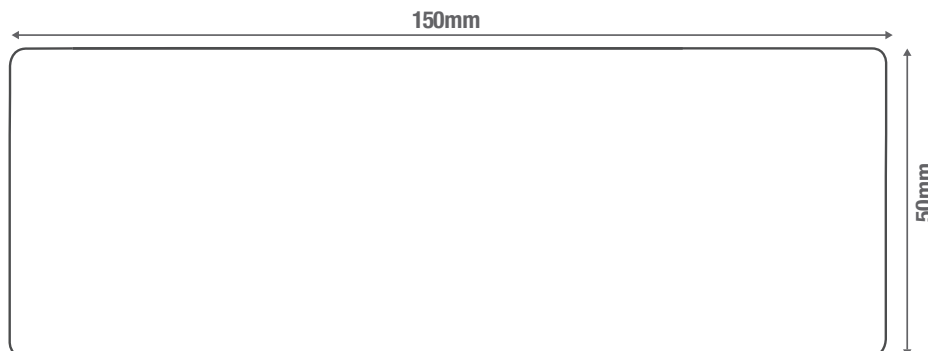

Use on concrete, grass or uneven ground

Joists are available in a dark brown colour, measuring 3m long and 50mm x 150mm in width and thickness.

SPECIFICATIONS	
Each Joist measures	3000mm x 50mm x 150mm
Each Joist weighs approximately	19.5kgs

We recommend purchasing for every square metre of Decking one Plastic Joist and they should be spaced no more than 400mm apart, so that your base is as strong and reliable as possible. For more information on how to install correctly, consult our Installation Guides.
