INSTALLATION ADVICE

Before you start

Start by marking out positions of each Post on your Decking area using string as a guide line to ensure the Posts are lined up. It is advised to start at one corner and mark each of the Posts at intervals matching the distance of the Balustrade's Handrail. Once marked and checked, predrill 8mm pilot holes for the Posts, without installing them at this stage.

Posts

Install the first Post, ensuring it is level and securely fixed with a Coach Bolt (at least 60mm deep). The Post

must be above the Joist Frame, not into the Decking Board. Secure all screws, then cover with Foot Caps, which snap into place. Finish by installing and securing the Post Cap with a matching screw.

Balustrade Handrail

Ensure the Balustrade is securely positioned against the Post and level. Mark the screw positions and predrill 8mm pilot holes. Slide the Fixing Bracket onto the Handrail before securing the Balustrade into place with Coach Bolts. Cover the fixings with the supplied Foot Cap for a neat finish.

For detailed information about installation, please read our Balustrade Installation Guide.

MATERIALS

The Aluminium Decking Balustrade is crafted from extruded and welded Aluminium Sections, ensuring exceptional strength and durability.

Designed for low-maintenance performance, it features a non-corrosive surface that withstands exposure to the elements.

Finished in a sleek black coating, this modern and stylish Balustrade complements a variety of outdoor spaces, providing both functionality and aesthetic appeal.

INSTALLATION

Handrails are manufactured and sold as complete sections, requiring no self-assembly for a quick and hassle-free installation. Designed to fit easily between Balustrade Posts, they provide a secure and stylish addition to any outdoor space.

ACCESSORIES

Handrail Balustrades can be seamlessly combined with Balustrade Posts, Gates, and Stair Sections to create a complete and secure installation. By adding consecutive Handrail Sections, you can achieve the precise length required for your project.

This versatile system allows you to customise your Balustrade System to suit any Decking or outdoor space, providing both functionality and style for a durable, long-lasting solution.

INTERCHANGEABLE

The Balustrade Handrail System is available in multiple lengths, offering a versatile solution for any project. Whether you are working on a small residential Deck or a large commercial installation, the adjustable lengths allow for a customised fit to suit your requirements.

This flexibility ensures a seamless and secure installation, combining functionality and style to enhance your outdoor space.

LONG LASTING

Handrail Sections are strong, durable, and visually appealing, offering a high-quality alternative to other Balustrade options. Designed for superior strength and longevity, they provide peace of mind for any Decking project.

Built to withstand the elements, these Handrails offer a low-maintenance, long-lasting solution for both residential and commercial spaces. Combining style and functionality, they create a secure and attractive railing system for any outdoor area.

ENHANCE YOUR PROJECT WITH A BALUSTRADE SYSTEM

Finish your Decking project with the Balustrade Handrail, available in multiple lengths to suit your requirements. Designed for durability and ease of installation, it provides both safety and style while enhancing the overall look of your outdoor space.

The Balustrade Handrail can be painted to match your Decking or other outdoor features, creating a seamless and contemporary look.
