

DECKING FRAME HEAVY DUTY WEED MAT, 20M

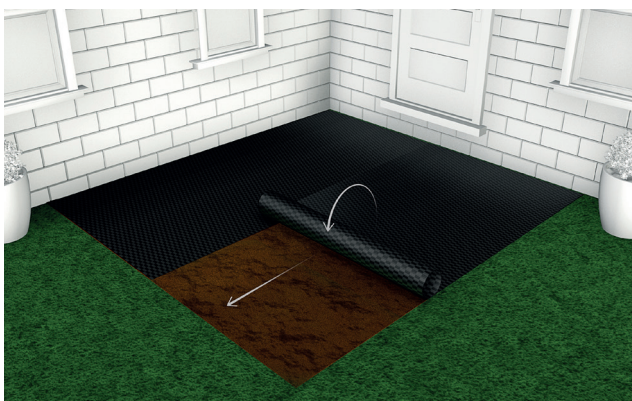

Cladco Heavy Duty Weed Mat is a breathable, woven material used to control the growth of plants, or weeds, and to prevent any from growing through into your Decking installation.

The tough, Heavy Duty Weed Control Mat creates a high-quality base for your Decking area. This can be applied directly over grass, or soil, and used in place of a concrete base.

The solid, woven design of Heavy Duty Weed Mat features a cross fibre polypropylene pattern that allows for water and nutrients to drain through, making sure the soil underneath is not affected in the process.

| SPECIFICATIONS | |
|--------------------|---|
| Length | 20m |
| Width | 2m |
| Thickness | 100gsm |
| Approximate Weight | 7kg |
| Colour | Black |
| Material | Cross fibre thermoplastic (polypropylene) |

How to lay Cladco Weed Control Mat

- Measure the area to be covered. It is recommended to overlap Cladco Weed Mat to remove any gaps through to the ground.
- Fork over the area to be covered and remove any weeds, debris or stones from the site.
- Lay your Cladco Weed Mat on top of the prepared soil, overlapping as you go to prevent weeds and plants from growing through.
- Cover the Weed Mat with your desired coverage, such as chippings, bark or stones, so none of the Weed Mat material is exposed.
- Covering the material will elongate the fabric's lifespan and stop weeds in the area for years to come.
