

# COMPOSITE DECKING STAINLESS STEEL CLIPS

Cladco Stainless Steel Clips secure tightly and easily into Cladco Composite Decking Boards for a hidden connection between Boards.

Stainless Steel Clips and M4x30 Wood Screws fit within the grooves of Cladco Composite Decking Boards for increased wear and corrosion resistance.

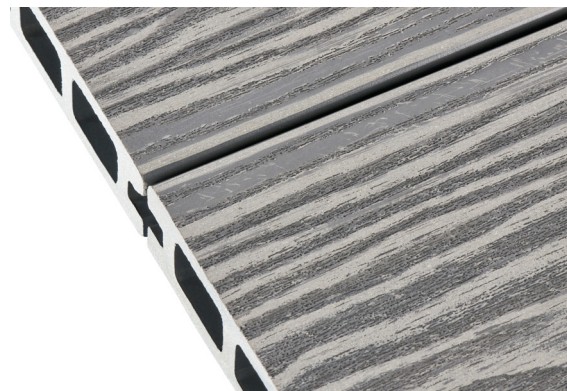

These Clips have the added bonus of not only connecting your Cladco Decking®, but also providing a hidden join thanks to the absence of a bulky fastening T-Clip system.

We advise connecting 7 Clips for every 2.4 metres of Cladco Decking® and 11 Clips for every four metres of Cladco Decking®.

We recommend using a PH2 bit for the M4x30 Stainless Steel Wood Screws. Using these Clips will create a 2-3mm space between Cladco Composite Decking Boards.

SPECIFICATIONS	
Board Gap	2-3mm spacing between Boards
Pack Size	100
Recommended Quantity	11 T-Clips per 4m Board, 7 T-Clips per 2.4m Board
Material	Stainless steel
