INSTALLATION

STARTER CLIP SPECIFICATIONS

Size	27mm x 10mm
Material	Stainless steel
Pack size	50
Fixings	M4 x 25mm stainless steel screws included

MATERIALS

The Composite Starter Clips are made from stainless steel to provide stable fixing for your Composite Decking.

SURFACES

These Starter Clips ensure that the surface of your Composite Decking is stable and level.

ACCESSORIES

Can be used alongside the Composite T-Clips and Screws to create a secure and sturdy Deck.

LOW MAINTENANCE

The stainless steel materials means that the Starter Clips are resistant to corrosion which minimises maintenance.

LONG-LASTING

These Starter Clips are resistant to water and corrosion, making them a long-lasting addition to the stability of your Composite Decking area.

Starter Clips

Cladco Composite Decking Starter Clips and 50 M4 x 25mm screws ensure a precise and accurate fitting when installing decking boards against a wall or fence.

Installing Composite Decking correctly from the start is essential. Cladco Starter Clips help prevent unnecessary adjustments during installation, providing a seamless and secure fixing.

Made from precision-cut stainless steel, Cladco Composite Decking Starter Clips are designed for durability. With enhanced corrosion and wear-resistant properties, these clips are built to last for the lifetime of your decking project, offering additional peace of mind.

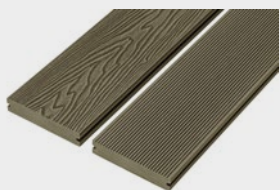

Each pack contains 50 Cladco Composite Decking Starter Clips and 50 M4 x 25mm screws, with one pack recommended per installation project. For additional guidance, refer to our Composite Decking Installation Guide.

Cladco Stainless Steel Starter Clips are specifically designed for use with Cladco Composite Decking products and are not suitable for use with Aluminium Decking.

Adhering to these guidelines will help ensure proper installation and longevity of your Composite Decking. Failure to follow these guidelines will invalidate the product's warranty.
