

TIMBER FIXINGS

STAINLESS STEEL SCREWS

When you need to firmly secure your Boards to your timber support battens or Joists, Cladco M4x40 Stainless Steel Wood Screws are necessary for a secure, correct fit.

Each pack contains 100 Stainless Steel Wood Screws. The screws can be easily installed using a PH2 Screwdriver bit. These screws are stainless steel and should not rust or corrode once installed. The Screws are strong, durable and made of high-quality stainless steel, ensuring that Boards will not crack or splinter around the screw's entry point.

The M4x40 Stainless Steel Wood Screws do not need a pre-drilled pilot hole. Cladco M4x40 Stainless Steel Wood Screws are designed to secure products to timber joists and purlins.
