

INTERNAL WALLS

Slatted Wall Panels 2.4m

Cladco Internal Slatted Wall Panels are quick and easy to install onto interior walls using nails, screws or wall grab adhesive. Panels can be installed in either a horizontal or vertical direction to create a bespoke look.

Internal Slatted Wall Panels feature narrow, decor-wrapped MDF slats that are built onto a recycled PET felt base (manufactured from post-consumer plastic bottles). This makes for an environmentally friendly design with excellent acoustic properties.

Please note that Internal Slatted Wall Panels are designed for internal use only and are not recommended to be used in areas of high humidity.

Available in 2.4-metre lengths, each Panel simply sits flush with the next Panel and is secured through the recycled felt base. Each Panel can be cut with a handsaw or circular saw, or a utility knife through the felt.

Recycled PET Felt Base

Horizontal Or Vertical Direction

Easy To Clean

Available In 4 Colours

Quick To Install

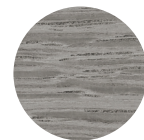

Woodgrain Effect Surface
