

CAPPED COMPOSITE Slatted Cladding Panels 2.5m

Cladco Composite Slatted Wall Cladding Panels offer a contemporary cladding solution for exterior walls. Manufactured using a capped composite construction, each Panel features a subtle textured grain effect across four slats.

Available in six colours, with matching Trims available, Slatted Panels are easy to install onto supporting Battens. The hollow core construction of Cladco Slatted Wall Cladding reduces the overall weight of each Panel.

Slatted Panels are designed with a tongue-and-groove fitting, with overlapping edges. This installation method hides fixings for a discreet finish. Please see our Installation Guide for more information.
