

HOLLOW DOMESTIC GRADE

Composite Decking Board 4m

Cladco hollow composite deck boards are reversible, with one side utilising a flat surface, and the other with narrow grooved spaces that makes them low-slip and less susceptible to watermarks and staining. Its recommended to use the narrow grooved side of the boards due to their low-slip properties when it comes to fitting for your project. Cladco decking boards are versatile and can be cut to size and also sanded if required.

All Cladco composite decking products are available as FSC® certified for the same cost. If you require FSC® certified products please ask for these when placing your order.

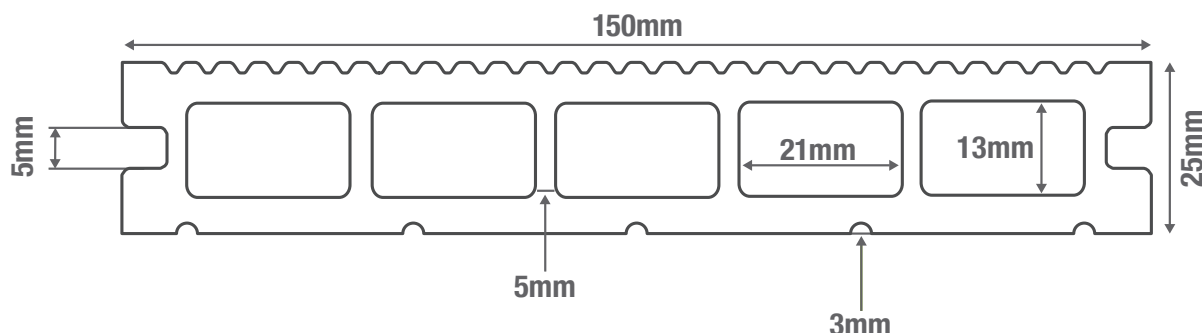

Why Our 4m Hollow Decking Boards Are A Great Option

Whether you're looking to create a new garden, patio area, steps or larger scale project, Cladco composite decking is the perfect option for your project.

Utilising a honeycomb structure that makes the boards lightweight, Cladco hollow domestic grade decking boards are made from a combination of 60% recycled hardwood fibres and 40% high grade recycled polyethene, bonding agent, additives and tint. Easy to maintain and clean.

SPECIFICATIONS	
Board Length	4metre
Board Width	150mm
Board Thickness	25mm
Each board weighs approximately	10.8kg
