

PREMIUM WOODGRAIN EFFECT CAPSTOCK PVC Bullnose Board 3.6m

Cladco Premium PVC Bullnose Decking Boards have superior high-end co-extrusion technology which has created a new range of Superior Decking. Cladco Premium PVC Decking Boards are timber free which reduces risk of fading, scratching or stains but will still achieve a natural timber-like effect without compromising on quality.

The dense core within these boards are made from PVC which is then covered in ASA (acrylic-styrene-acrylonitrile) which is the highest quality weather-resistant resin available. This superior material offers both strength and durability even in wet weather conditions.

Premium PVC Bullnose Boards are manufactured from the same superior synthetic material to complement the Premium PVC Decking Range and are a great solution for customers wanting a superior decking product at a competitive price.

Beneficial Properties of Premium PVC Bullnose Decking Boards

ASA material which stands for Acrylic-styrene-acrylonitrile is a superior weather-resistant resin that does not fade and is 100% resistant to UV. Premium PVC Decking is often used by high-end car manufacturers ensuring it is perfect to be used in all weather conditions. The ASA Resin material is highly resistant to damp conditions, resistant to mould, mildew resistant and rot-resistant.

The Premium PVC Bullnose Boards are suitable to be used in decking projects which require the decking to be installed low to the ground and in

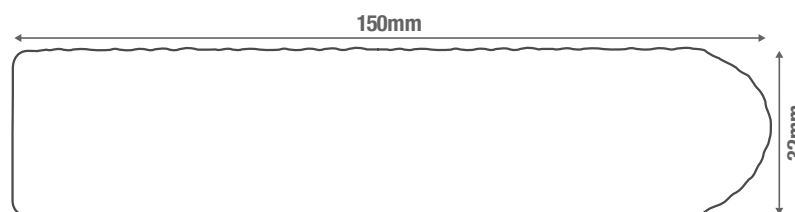

areas which are prone to damp. The PVC material has superior moisture-resistance ensuring even the wettest areas can benefit from installing Premium PVC Decking.

Premium PVC Decking can be installed in areas that are prone to moisture such as swimming pools and hot tubs. The ASA coating on this decking ensures a robust and sturdy exterior that is resistant to stains or scratches. The PVC material is not porous which ensures most stains can be simply wiped off.

Premium PVC Decking is easy to maintain, simply wash it regularly with soap and water, keep it looking its very best with an occasional pressure wash.

SPECIFICATIONS	
Board Length	3.6metre
Board Width	150mm
Board Thickness	32mm
Each board weighs approximately	10.72kg
