

START TRIM

Fibre Cement Trim

When Cladding your home, you want to make sure all the Boards are installed level. With the Cladco Fibre Cement Wall Cladding Start Trims, your Boards should be supported and aligned throughout your installation. Cladco Aluminum Start Trims are designed to sit at a slight angle, assisting the attractive feather boarding installation technique and providing the stand and support for the first Board to be fitted onto the structural Battens. Cladco Fibre Cement Wall Cladding Starter Strip should be installed at the wall's base, and above any doors or windows. The Start Trim should be installed above the Perforated Closure, with a 38mm Screw.

All Cladco Fibre Cement Wall Cladding Trims are available in a range of seven colours, manufactured to match the colour of your Cladco Fibre Cement Wall Cladding Boards for an attractive and seamless design. Trims do not require any staining or painting and are manufactured onsite using high-quality aluminium for a stain, rust and corrosion resistant product.

CLADCO TRIMS

PERFORATED CLOSURE
Installed under the Battens at the base of the build, or at the top of any doors and windows, to ensure ventilation throughout the installation. Perforated Closure also protects the build from any dirt or insects penetrating the air flow space.

INTERNAL CORNER TRIM
Used in the inside of a door frame or porch for a neat seamless finish.

CONNECTION PROFILE
Installed around window reveals and door frames to support Boards.

START TRIM
Installed at the start of new Board runs at the base of the building, or above windows and doors for support.

SYMMETRIC EXTERNAL CORNER TRIM
Designed to fit on the corners of the building, the Fibre Cement Wall Cladding Boards are then installed to flat edges of the Trims.

ASYMMETRIC EXTERNAL CORNER TRIM
Designed to be installed on either side of the door or window, allowing Boards to be fitted on the flat surface of the Trim.

SPECIFICATIONS	
Length	3 metres
