

CONCRETE DECKING BLOCK SUBFRAME SYSTEM

Designed for easy installation on grass, this concrete decking block is compatible with Cladco's Decking Subframe System. It features integrated drainage channels, allows for angle adjustment with the use of spacers, and eliminates the need for on-site concrete pouring. Quick to install, cost-effective, and easy to reposition, it offers a flexible, low-maintenance solution for your decking projects.

INTEGRATED DRAINAGE CHANNELS

SPECIFICATIONS

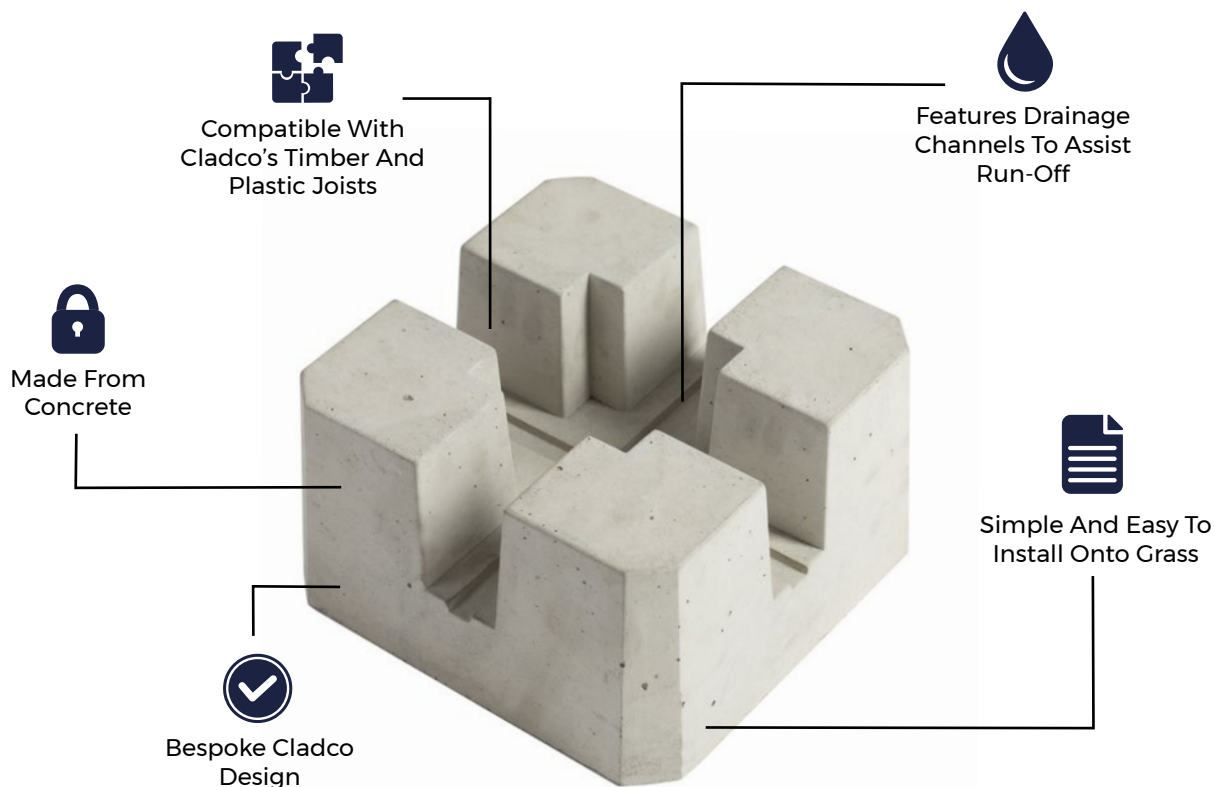

Size	280mm x 280mm x 160mm
Material	Concrete

SKU

CFP160

***Please Note:** Slight size variations may occur during the curing process.

MATERIALS

Made from solid concrete to provide a stable foundation for solid surfaces, even when installed directly on grass.

LONG LASTING

Resistant to water damage and designed with integrated drainage channels to aid runoff, Cladco Concrete Decking Blocks ensure durability in all weather conditions.

ACCESSORIES

Compatible with the existing decking subframe system, with the option to adjust angles using Concrete Decking Block Shims.

LOW MAINTENANCE

Eliminates the need to pour concrete on-site, reducing mess, labour, and installation time.

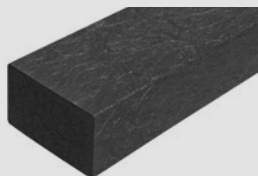

EASY TO USE

Cladco Concrete Decking Blocks are quick to install and can be easily moved and repositioned for a precise, long-lasting installation.
