

DOUBLE CONNECTION TRIM

Fibre Cement Lap Trim

Cladco Fibre Cement Lap Aluminium Connection Profile Trim is designed to wraparound a single Fibre Cement Lap Board's edge and either a soffit, window or door reveal. The Trim is often used to finish feather boarding Wall Cladding installations.

Cladco Fibre Cement Lap Connection Profiles are manufactured with a slight lip, which perfectly fits a Cladco Fibre Cement Lap Wall Cladding Board and can be installed using Cladco Fibre Cement 38mm Screws.

Protecting your Board's edges from the elements, the Trims also allow your Wall Cladding Board to be fitted closer to the edge of your wall.

All Cladco Fibre Cement Lap Wall Cladding Trims are available in a range of eight colours, manufactured to match the colour of your Cladco Fibre Cement Lap Wall Cladding Boards for an attractive and seamless design.

Trims do not require any staining or painting, and are manufactured onsite using high-quality aluminium for a stain, rust and corrosion resistant product.
