Responsibly Sourced  
Materials

Durable Green  
Pressure Treated  
Timber

Classified As Use  
Class 2

#### MATERIALS

Cladco timber battens are made from softwood spruce for a timber finish combined with easy installation.

#### SURFACES?

The treated battens have protection against decay and insect attack, to maintain a stable surface for cladding to adjoin to.

#### ACCESSORIES

Fixings and clips are available to securely install cladding boards, with trims to finish.

#### RESISTANCE

These battens are sawn and green treated with Tanalith 'E' preservative to ensure long-lasting protection from the elements.

#### EASY TO INSTALL

The softwood spruce of the timber makes using screws and fixings simple and efficient.

## INSTALLATION ADVICE

Ensure that the installation surface is flat and stable. Then pre-drill both the timber battens and the surface.

#### Horizontal Installation:

Secure battens running vertically at a maximum distance of 500mm apart.

#### Vertical Installation:

Battens should be horizontally installed, again a maximum of 500mm apart.

For full installation guidance, please refer to our online cladding installation guides.
